## UPCOMING EVENTS

- Oct. 4: Craft Fair
- Oct. 7: SVFT meeting - after school
- Oct. 8: PSAT Readiness Check, Grade 11
- Oct. 14: Balfour Representative Visit

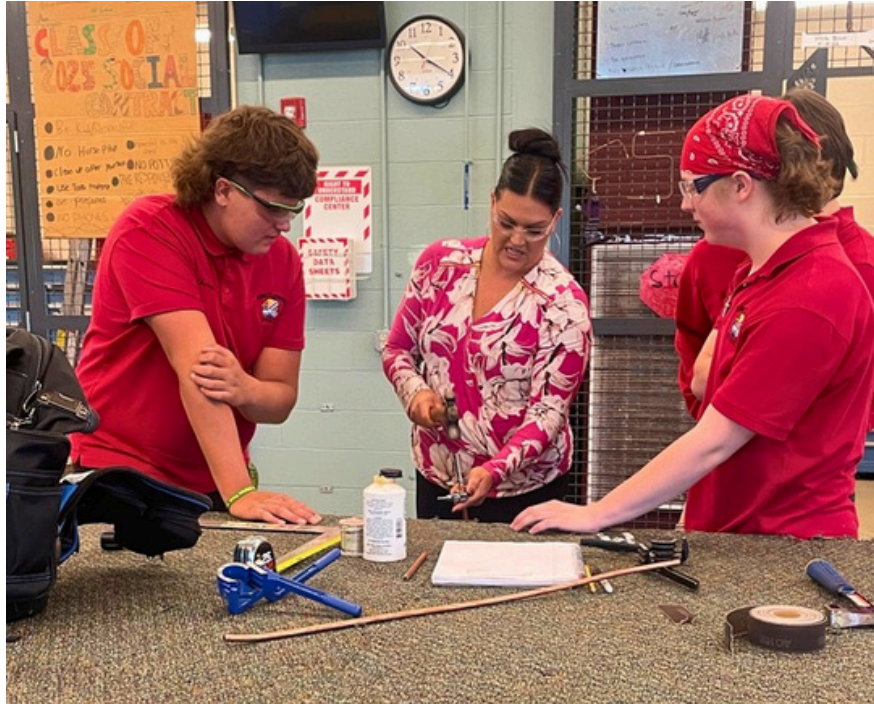

## SOLDERING WITH SEITLINGER

The 11th-grade HVAC class recently taught Mrs. Seitlinger how to create, measure, cut, bend, swage, and solder copper tubing.

During her time getting hand-on in the trade, Mr. Tumyol and the juniors helped her turn raw material into a finished product.

From measuring to soldering, our 11th grade HVAC students are mastering the art of copper tubing with AP Mrs. Seitlinger.

What a great real-world skill!

## **EOB STUDENT COUNCIL VISITS STATE STUDENT CONGRESS**

On Monday, September 29<sup>th</sup> the Student Council officers attended their first State Student Congress meeting at E.C. Goodwin Technical High School. The students attended to learn some leadership skills and to elect the 2025-2026 State Student Congress officers. Our school was very well represented by President Cassidy Lombardo, Co-Vice Presidents Brody Lombardo and Pedro Galbim and Secretary Madelyn Kellogg. Our students worked very well with all of the officers from other technical high schools to share our school's core values and how we can incorporate them back in our school.

We had three students run for elections and Madelyn Kellogg was elected as the 2025-2026 State Student Congress Secretary. We are looking forward to working with the technical high schools through the Student Congress to help our communities both in and out of school.

## **SKILL BUILDING: HVAC**

Senior HVAC students learned the procedure for installing underground Natural gas lines for a Residential home during their first shop cycle. Students dug a 24" trench to a simulated house with a home generator. This hands-on project teaches essential skills for the HVAC industry!

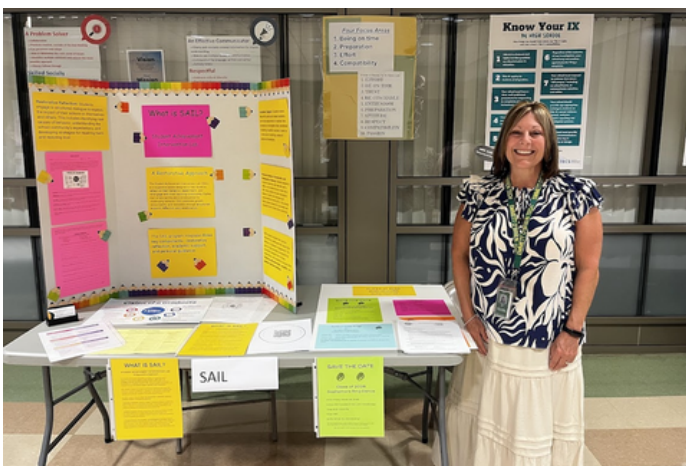

## FALL IS HERE!

10<sup>th</sup> grade students Fall woodworking projects:  
Andrew Sims, Lilly Russell, Michael Joseph,  
Gavin Gibeau

## BACK TO SCHOOL NIGHT A SUCCESS!

We welcomed over 100 families in the building on Sept 16 for our annual Back to School Night.

| Kintsugi:                                        | Restorative Practice:                                   |
|--------------------------------------------------|---------------------------------------------------------|
| Starting off with a "whole"                      | Starting with a positive relationship; teacher/students |
| Breaking the item/pottery                        | Breaking the relationship of teacher/student (issue)    |
| Look at all of the pieces                        | Review the issue that occurred                          |
| Lay out the pieces to put the item back together | Listen to both sides                                    |
| Glue the pieces together                         | develop a plan to mend the relationship                 |
| Fill all of the seams with gold or silver        | Follow plan                                             |
| Piece of art is the end product                  | Repair the harm to rebuild relationship                 |

### Similarities and synergy:

The philosophies of Kintsugi and restorative practice offer striking parallels in their approach to healing and transformation:

1. Embracing Brokenness: Both recognize that experiences of harm or trauma are part of life's journey and can lead to new forms of strength and beauty, rather than being something to hide or discard.
2. The Healing Process: Just as Kintsugi involves a careful and deliberate process of repairing pottery, restorative practice emphasizes a structured approach to addressing harm and rebuilding relationships.
3. Transformation and Growth: Both highlight that healing is not about simply returning to a prior state but about becoming something stronger and more resilient, with the scars becoming symbols of strength and wisdom.
